# AHERA ASBESTOS MANAGEMENT PLAN

## DESIGNATED PERSON TRUTH AND CORRECT STATEMENT

**Local Education Agency –** Greater Clark County Schools

2112 Utica-Sellersburg Road Jeffersonville, Indiana 47130

**Designated Person -** Alliance Environmental Group, Inc.

Sandra Shadley

5153 Commerce Square Drive, Suite E

Indianapolis, Indiana 46237

This Truth and Correct Statement, as outlined in 40 CFR 763.93(i), certifies that the general, local education agency responsibilities, as stipulated by 40 CFR 763.84, have been or will be met. These responsibilities include:

- 1. Ensure that the activities of any persons who perform inspections, reinspections, and periodic surveillance, develop and update management plans, and develop and implement response actions, including operations and maintenance, are carried out in accordance with 40 CFR 763 Subpart E.
- 2. Ensure all custodial and maintenance employees are properly trained as required by 40 CFR 763 Subpart E and other applicable Federal and/or State regulations (e.g., the Occupational Safety and Health Administration Asbestos Standard for Construction, the EPA Worker Protection Rule, or applicable State regulations).
- 3. Ensure that workers and building occupants, or their legal guardians, are informed at least once each school year about inspections, response actions, and post-response action activities, including periodic reinspection and surveillance activities that are planned or in progress.
- 4. Ensure that short-term workers (e.g., telephone repair workers, utility workers, or exterminators) who may come in contact with asbestos in a school are provided information regarding the locations of ACBM and suspected ACBM assumed to be ACM.
- 5. Ensure that warning labels are posted in accordance with Section 763.95.
- 6. Ensure management plans are available for inspection and notification of such availability has been provided as specified in the management plan under Section 763.93(g).
- 7. The undersigned person designated by the LEA pursuant to Section 763.84(g) (1) has received adequate training as stipulated in Section 763.84(g) (2).
- 8. The LEA has and will consider whether any conflict of interest may arise from the interrelationship among accredited personnel and whether that should influence the selection of accredited personnel to perform activities under Part 763.

#### **ASBESTOS PROGRAM MASTER INDEX**

The following volumes are part of the Asbestos Program for the **GREATER CLARK COUNTY SCHOOLS**:

- A. Original Asbestos Management Plan for each school building.
- B. Asbestos Management Plan Supplement for each school building.
  - 1. Amendments to Management Plan
  - 2. Remaining Materials Report
  - 3. Surveillance, Reinspection and Additional Bulk Sampling Information
  - 4. Annual Notifications, Accreditations and Training Records
  - 5. Operations and Maintenance Records
  - 6. Asbestos Removal Projects
  - 7. Short Term Worker Program

Copies of both volumes are found in the respective buildings. The Administration Building also contains duplicate copies of both volumes for each building in their entirety.

#### **ACCREDITATION STATEMENT**

The Greater Clark County Schools ensures that the following items will be carried out:

Activities of any persons who perform inspections, reinspections, and periodic surveillance, develop and update management plans, and develop and implement response actions, including operations and maintenance, are carried out in accordance with Subpart E of this part.

All custodial and maintenance employees are properly trained as required by this Subpart E and other applicable Federal and/or State regulations (e.g., the OSHA asbestos standard for construction, the EPA worker protection rule, or applicable State regulations).

Workers and building occupants, or their legal guardians, are informed at least once each school year about inspections, response actions, and post response action activities, including periodic reinspection and surveillance activities that are planned or in progress.

Short-term workers (e.g., telephone repair workers, utility workers, or exterminators) who may come in contact with asbestos in a school are provided information regarding the locations of ACBM and suspected ACBM assumed to be ACM.

Warning labels are posted in accordance with 763.95.

Management plans are available for inspection and notification of such availability has been provided as specified in the management plan under 763.93(g).

Designate a person to ensure that requirements under this section are properly implemented.

Designated person receives adequate training to perform duties assigned under this section. Such training shall provide, as necessary, basic knowledge of:

Health effects of asbestos

Detection, identification, and assessment of ACM

Options for controlling ACBM

Asbestos management programs

Relevant Federal and State regulations concerning asbestos, including those in this Subpart E and those of the OSHA, U.S. Department of Labor, the U.S. Department of Transportation and the u.S. Environmental Protection Agency.

Consider whether any conflict of interest may arise from the interrelationship among accredited personnel and whether that should influence the selection of accredited personnel to perform activities under this subpart.

PERIODIC SURVEILLANCE
REINSPECTION
ADDITIONAL BULK SAMPLING
INFORMATION

#### ASSESSMENTS FOR AHERA

- 1. Damaged or significantly damaged thermal systems insulation.
- 2. Damaged friable surfacing ACM.
- 3. Significantly damaged friable surfacing ACM.
- 4. Damaged or significantly damaged friable miscellaneous ACM.
- 5. ACBM with potential for damage.
- 6. ACBM with potential for significant damage.
- 7. Any remaining friable ACBM or friable suspected ACBM.

If a material is non-friable, it does not require an assessment rating under AHERA.

Due to the differences in what is required of the LEA for damaged material compared to significantly damaged material, Alliance has modified the assessment scale to the following:

- 1A. Significantly damaged thermal systems insulation.
- 1B. Damaged thermal systems insulation.
- 4A. Significantly damaged friable miscellaneous ACM.
- 4B. Damaged friable miscellaneous ACM.

#### **GREATER CLARK COUNTY SCHOOLS**

The ACBM in this building will be periodically inspected to determine any change in the condition of the materials for as long as the material remain in the building, as required by the Asbestos Hazard Emergency Response Act (AHERA). This periodic surveillance shall be conducted on a semi-annual basis as required by law.

Records of each re-inspection will be maintained in this binder.

**Material Description** 

Gaskets on Boilers

Comments

Front doors and rear were open on both boilers exposing the fiberglass rope gasket. The burner assembly was still in place and that gasket could not be seen. There does not appear to be 132 square feet of suspect material.

INSPECTOR NAME:

# THIRD YEAR REINSPECTIONS

#### REINSPECTION PLAN

#### **GREATER CLARK COUNTY SCHOOLS**

Reinspection by an accredited building inspector will be scheduled to be performed not more than three years from the date of the original inspection. The reinspection report will then be made a permanent part of this Management Plan. Reinspections will be performed every three years for as long as the building contains ACBM, and will be reinspected once within three years from the date that all ACBM has been removed.

Records of each reinspection should be maintained in this binder.

| DATE PLANNED     | DATE COMPLETED | COMPLETED BY     |

#### **REINSPECTION PLAN**

# GREATER CLARK COUNTY SCHOOLS JEFFERSONVILLE HIGH SCHOOL

The ACBM in this building shall be reinspected every three years to determine any change in the condition of the materials for as long they remain in the building. This reinspection will be conducted tri-annually by an accredited inspector.

The following table outlines the dates on which these inspections should take place in this school building.

#### REINSPECTION SCHEDULE

| DATE PLANNED | DATE COMPLETED | COMPLETED BY |
|--------------|----------------|--------------|
| JUNE 1992    | JUNE 1992      | ASBESTECH    |
| JUNE 1995    | June '95       | alleance     |
| JUNE 1998    | June '98       | alliance     |
| JUNE 2001    | July '01       | P. Wilson    |
| JUNE 2004    | July '04       | C. Specks    |

Cove base mastic

Comments

Where visible under the old cove base, this material was not in poor condition. New mastic has been used under the new cove base in the first and second floor hallways. It is not suspect for asbestos content.

**Material Description** 

Gaskets on boilers

#### Comments

State

The burner assembly was still in place. There does not appear to be 132 square feet of suspect material. The gasket material on the upper, newer boiler appears to be fiberglass. The boilers were not in operation during this reinspection, so I was able to observe sample the material in good condition.

**Material Description** 

Boiler insulation on 2 boilers

#### Comments

Material is in good condition. Quite a bit of O & M has been performed on the two boilers with encapsulating mastic. The left boiler has had a small O & M project done to expose the side for repair. This was done by trained school personnel using glovebag methods. The small glovebagged area was approximately 18" X 18" and was sealed up with mastic.

Cove base molding

**Comments** 

All material in first floor corridors has been replaced with new black cove base molding. Second floor received new carpet in June 2000. Most cove base is in areas that did not get carpeted. The old cove base is in good condition overall with minor scrapes observed.

Laboratory Batch Number: 980110

ATC Project Number: 70424.9701

Dear Mr. Gaddis:

Enclosed are the results from the bulk asbestos analysis for the 1 sample submitted to the ATC Asbestos Laboratory on January 26, 1998. Percentages were determined by visually estimating the area percentage for each type of fibrous material. Samples estimated to contain less than ten percent asbestos fibers may require quantification by point counting. These samples may be resubmitted at your discretion.

ATC will hold your samples for thirty days after the completion of the analysis. At the end of the thirty day period, it will be our policy to dispose of the samples unless prior arrangements are made.

It has been a pleasure serving you. If there are any questions, please contact me at (317) 849-4990.

Respectfully submitted, ATC Associates Inc.

Patrick Stanford Strunfore

Group Leader

#### ATC ASSOCIATES INC. **BULK SAMPLE ANALYSIS REPORT**

| Lab <u>ID Client ID</u> | Color / Description | Layer(s) | Asbestos Type %      | Other Fibrous  Material % | Non-Fibrous<br><u>Material</u> |
|-------------------------|---------------------|----------|----------------------|---------------------------|--------------------------------|
| 001 JHS-01              | Black Material      | 1        | No Asbestos Detected | Cellulose <1 Manmade 5-10 | Binder                         |

Winders,

- Analytical Methods: EPA 600/M4-82-020, December 82, EPA 600/R-93/116, July 1993
- Enclosed test results relates only to items tested.
- This report shall not be reproduced, except in full without written approval of the laboratory.
- This report can not be used to claim product endorsement by NVLAP or any agency of the U.S. Government.
- Method limitations: Analysis of floor tile and other resinously bound naterials by Polarized Light Microscopy (PLM) may yield false negative results due to method limitations. In these cases ATC recommends alternative methods of analysis.
- For all heterogeneous samples easily separated into sub-samples each component will be analyzed separately. When layers cannot be separated without compromising the layer they will be analyzed as one sample. When a heterogeneous sample contains no asbestos in any layer reported results will be combined into one. When asbestos is detected in a layer or layers of a heterogeneous sample each individual layer will be reported separately.

This information is being published to comply with the requirements of 40 CFR 763, Subpart E, Asbestos Containing Materials in Schools. This regulation, commonly known as the "AHERA" rule, requires local education agencies, such as this one, to perform certain tasks in regards to the presence and control of asbestos containing materials in the buildings under the jurisdiction of the local education agency.

These include but are not limited to:

- 1. Developing an asbestos management plan which is designed to outline procedures and guidelines for the initial inspection, triennial reinspections, and 6 month periodic surveillance of asbestos-containing materials that are present in the buildings.
- 2. Provide awareness training and additional training to selected school employees.
- 3. Periodically notify all workers and occupants, or their local guardians, parent teacher organizations, and collective bargaining organizations of the availability of asbestos management plans, the location of same and the times that the plans may be reviewed.

This notification is to advise all patrons, occupants, or their legal guardians, collective bargaining organizations, and parent-teachers organizations, that the asbestos management plans required under this act are available for review upon request. The plans can be viewed by any person during normal business hours of the particular school. Interested parties wishing to inquire about the plans should contact the individual school office. Master copies of the plans for all buildings under the jurisdiction of this local education agency are available in the Auxiliary Services at River Valley Middle School, which is located at 2220 Veteran's Parkway, Jeffersonville, Indiana 47130; telephone number (812) 288-4821. Inquiries regarding any facet of the regulation or the management plans should be directed to Mr. Steve Hobgood at the above telephone number during regular business hours.

Greater Clark County Schools, school facilities, and buildings which contain asbestos-containing materials (ACMs) and must comply with the 40 CFR 763, Subpart E (AHERA) regulations include:

Jeffersonville, Charlestown and New Washington High Schools; Parkview, River Valley and Charlestown Middle Schools; Wilson, Thomas Jefferson, Northaven, New Washington, Jonathan Jennings, Bridgepoint, Maple, Spring Hill, and Parkwood Elementary Schools, Service Center, Corden Porter Storage, Auto Tech Program- Witten Property, and Corden Porter Center with Gym.

Listed is a brief description of asbestos projects currently ongoing and completed at our facilities this past school year, as well as activities currently scheduled for the 2015/2016 school year. Detailed reports of each activity will become a part of each school's asbestos management plan and may be reviewed in the school office.

- \* The required triennial re-inspection will be performed in April 2016.
- \* The required six month periodic surveillance was performed in October 2014.
- \* The required six month periodic surveillance activities are scheduled for April and October each year.

School facilities and buildings that are asbestos free and require no surveillance or reinspection are:

This information is being published to comply with the requirements of 40 CFR 763, Subpart E, Asbestos Containing Materials in Schools. - \* The required six month periodic surveillance was performed in December 2011.
- \* The required six month periodic surveillance activities are scheduled for June and December each year.
- \* Projects completed in 2011: Options building and Parkwood Elementary.
- \* Projects scheduled for 2012: Parkview Middle School and Bridgepoint Elementary.
- \* Cordon Porter storage building was sold in 2012.

School facilities and buildings that are asbestos free and require no surveillance or reinspection are:

This information is being published to comply with the requirements of 40 CFR 763 Subpart E Asbestos Containing Materials in Schools. This regulation, commonly known as the "AHERA" rule, requires local education agencies, such as this one, to perform certain tasks in regards to the presence and control of asbestos containing materials in the buildings under the jurisdiction of the local education agency.

These include but are not limited to:

- Developing an asbestos management plan which is designed to outline procedures and guidelines for the inspection, reinspection and periodic surveillance of asbestos containing materials that are present in the buildings.
- 2. Provide awareness training and additional training to selected school employees.
- Periodically notify all workers and occupants, or their local guardians, parent teacher organizations, and collective bargaining organizations of the availability of asbestos management plans, the location of same and the times that the plans may be reviewed.

This notification is to advise all patrons, occupants, or their legal guardians, collective bargaining organizations, and parent-teachers organizations, that the asbestos management plans required under this act are available for review upon request. A copy of the plans for all buildings under the jurisdiction of this local education agency are available in the Auxillary Services building, which is located at 2710 E 10<sup>th</sup> Street, Jeffersonville, Indiana 47130; telephone number (812) 288-4821. Plans for individual schools and other buildings are located in the administration office of each school. The plans can be viewed by any person during normal business hours of the particular school. Interested parties wishing to inquire about the hours and times that the plans are available should call the above number.

At this time, the management plans can provide information regarding inspections, response actions, and post-response action activities, including periodic reinspection and surveillance activities that are planned or in progress. Inquiries regarding any facet of the regulation or the management plans should be directed to Mr. Steve Hobgood at the above telephone number during regular business hours.

Listed is a brief description of asbestos work that has been completed in our schools this year. Detailed reports have become part of each school's asbestos management plan and may be reviewed in the school office.

Jeffersonville, Charlestown and New Washington High Schools; Parkview, River Valley and Charlestown Middle Schools; Wilson, Thomas Jefferson, Northaven, New Washington, Jonathan Jennings, Bridgepoint, Maple, Spring Hill, and Parkwood Elementary Schools; the former Administration Building, Service Center, Options and Corden Porter Center Buildings and Alternative School-

- \* The required triennial reinspection will be performed in June 2013.
- \* The required six month periodic surveillance was performed in December 2010.
- \* The next scheduled activity is the required six month periodic surveillance in June 2011.
- \* Charlestown High School asbestos removal project was completed in 2010.
- Options Building is under renovation in 2011.
- \* Parkwood Elementary is under renovation in 2011.

Pleasant Ridge Elementary School, Utica Elementary School and the (New) Administration Building – These buildings are asbestos free and Riverside Elementary was demolished in 2006.

No surveillances or reinspections are required for these buildings.

#### AHERA Annual Notice

This information is being published to comply with the requirements of 40 CFR 763 Subpart E asbestos containing materials in schools. This regulation, commonly known as the "AHERA" rule, requires local education agencies, such as this one, to perform certain tasks in regards to the presence and control of asbestos containing materials in the buildings under the jurisdiction of the local education agency.

These include but are not limited to:

- 1. Developing an asbestos management plan which is designed to outline procedures and guidelines for the inspection, reinspection and periodic surveillance of asbestos containing materials that are present in the buildings.
- 2. Provide awareness training and additional training to selected school employees.
- Periodically notify all workers and occupants, or their local guardians, parent teacher organizations, and collective bargaining organizations of the availability of asbestos management plans, the location of same and the times that the plans may be reviewed.

This notification is to advise all patrons, occupants, or their legal guardians, collective bargaining organizations, and parent-teachers organizations, that the asbestos management plans required under this act are available for review upon request. A copy of the plans for all buildings under the jurisdiction of this local education agency are available in the Service Center building, which is located at 301 E. 11th Street, Jeffersonville, Indiana 47130; telephone number 288-4821. Plans for individual schools and other buildings are located in the administration office of each school. The plans can be viewed by any person during normal business hours of the particular school. Interested parties wishing to inquire about the hours and times that the plans are available should call the above number.

At this time, the management plans can provide information regarding inspections, response actions, and post-response action activities, including periodic reinspection and surveillance activities that are planned or in progress. Inquiries regarding any facet of the regulation or the management plans should be directed to Mr. Steve Meredith at the above telephone number during regular business hours.

Listed is a brief description of asbestos work that has been completed in our schools this year. Detailed reports have become part of each school's asbestos management plan and may be reviewed in the school office.

#### All school and support buildings where it is required -

- \* The required six month periodic surveillance was performed in June 1998.
- \* The required six month periodic surveillance was performed in December 1998.
- \* The next scheduled activity is a required periodic surveillance in June 1999.

#### Parkwood Elementary School

\* O & M was performed in the boiler room in May 1998.

Re: Asbestos Management Planner # 19A002720

Based upon the review of your license application, the Office of Air Quality has determined that you have fulfilled the requirements of 326 IAC 18 and are eligible for licensing in the following discipline:

#### Asbestos Management Planner

Your Asbestos Management Planner license is attached below. The license is waterproof and tear resistant. Please sign your license and do not laminate or after your license in anyway. Your license must be available for review at all times while implementing an asbestos project. This license may be revoked, pursuant to 326 IAC 18-1-7, if you:

- (1) Violate any requirements of these rules (326 IAC 18), 326 IAC 14-10, or any requirement of the Asbestos-Containing Materials in Schools Rule or any other federal, state, or local regulation pertaining to asbestos in buildings or to asbestos projects.
- (2) Falsify information on your application for licensing.
- (3) Fail to meet any qualifications specified in 326-IAC 18-1-4.
- (4) Conduct asbestos project, or related asbestos handling activity, in a manner which is hazardous to the public health.

Your license is valid effective 01/21/2010, and will expire on 01/21/2011, as indicated on your card. We suggest that you attend the required training and submit an application for license renewal early to insure your license does not lapse. NOTE: 326 IAC 18-1-4(h) and 326 IAC 18-1-6(e) require that any individual who has an eighteen (18) month lapse between any two training courses of the same discipline to attend an initial training course for the discipline in which they are seeking a license. In order to avoid re-taking the initial training course you must have attended a refresher in the discipline you are seeking a license within eighteen (18) months from the date of issuance of your last training course certificate.

#### **TRAINING**

# OPERATIONS AND MAINTENANCE INFORMATION

#### MINOR FIBER RELEASE EPISODE

The local education agency shall ensure that the procedures described below are followed in the event of a minor fiber release episode (i.e., the falling or dislodging of not more than 3 square or linear feet of friable ACBM):

- 1. Thoroughly saturate the debris using wet methods.
- 2. Clean the area using wet methods, protective clothing, HEPA-vacuums, mini-enclosures, glove bags, as necessary to inhibit the spread of any released fibers. At a minimum, workers should use air-purifying respirators with HEPA filters.
- 3. Place the asbestos debris in a sealed, leak-tight container, preferably a 6 mil. labeled plastic bag.
- 4. Repair the area of damaged ACM with materials such as asbestosfree spackling, plaster, cement, or insulation, or seal with latex paint or an encapsulant, or immediately have the appropriate response action implemented.
- 5. Each fiber release episode should be documented.

#### MAJOR FIBER RELEASE EPISODE

The local education agency shall ensure that the procedures described below are followed in the event of a major fiber release episode (i.e., the falling or dislodging of more than 3 square or linear feet of friable ACBM):

- 1. Restrict entry into the area and post signs to prevent entry into the area by persons other than those necessary to perform the response action.
- 2. Shut off or temporarily modify the air-handling system to prevent the distribution of fibers to other areas in the building.
- 3. AHERA requires that major fiber release episodes be designed by accredited Project Designers. However, the following response procedures should form the basis for response actions.
- 4. All the procedures recommended by EPA and required by OSHA for large-scale removal of ACM should be used. These include containment barrier, negative pressure ventilation, personal respiratory protection and protective clothing, decontamination facilities, and air testing.
- 5. Workers should wear "type C" respirators and protective clothing, including a body suit, hood, boots and gloves. Personal air monitoring may be conducted on representative workers, but is not required by OSHA when "type C" respirators are used.
- 6. Fallen debris should be sprayed with amended water and placed in plastic bags for disposal. Shovels are useful for collecting the debris. The floor should be thoroughly cleaned with a HEPA vacuum cleaner.
- 7. Walls, ceiling, pipes, boilers, or other surfaces where ACM was damaged or delaminated should be repaired temporarily. This might involve replastering with asbestos-free material, spraying with an encapsulant, or taping with duct tape. In some cases, ACM beyond the immediate area of damage may need to be removed to prevent additional episodes.
- 8. The air should be tested for asbestos fibers before the plastic barriers are removed and the area reoccupied. Testing should follow guidelines in Chapter 6 of the Purple Book and Chapter 4 of the Silver Book. That is, air should be sampled at the specified number of locations and analyzed by either phase contrast microscopy or transmission electron microscopy. However, sampling should not be done aggressively since the use of blowers and fans may dislodge fibers from the remaining ACM.

- 9. After the barriers have been taken down, a decontamination of the entire building or a portion of it should be considered. The need for this will depend on how rapidly the response team reacted to the episode and, in particular, how quickly the HVAC system was turned off. A thorough decontamination includes HEPA-vacuuming and/or wet wiping all carpets, furniture, and other surfaces. Decontamination of the HVAC system would involve disassembling and cleaning (HEPA-vacuuming or wet wiping) ducts, ventilators, registers, and other system parts. System filters should also be removed and replaced.
- 10. All equipment used in the cleanup operation should be washed or wiped with damp cloths. All disposable materials (e.g., cloths, mop heads, filters, coveralls) should be discarded as asbestos wastes.
- 11. Each fiber release episode should be documented.

# REMOVAL PROJECT INFORMATION

#### SHORT TERM WORKER PROGRAM

**Greater Clark County Schools** 

Short Term Worker

#### **GREATER CLARK COUNTY SCHOOLS**

#### SHORT-TERM WORKER SIGN OFF SHEET

This form should be signed each and every time before a "short-term worker" (telephone repair worker, utility worker, etc.) performs work that may cause him to come in contact with ACBM or suspected ACBM assumed to be ACM. One copy of this form should then be forwarded to the LEA designated person, and one copy should be maintained in the school building's copy of the supplemental binder provided by Alliance Indiana, Inc., in order to fulfill the LEA's recordkeeping requirements. The third copy should be forwarded to Alliance Indiana, Inc. for placement in its copy of the supplemental binder.
